for the senses

TYLÖ INFRA
INFRA CABIN PRIME

Tylö infra cabin Prime

Easy accessible warmth and comfort.

Relax in one of Tylö's infra cabins and let the comforting warmth embrace you. Allow yourself to have some time to yourself, listen to music from the built-in stereo equipment or read a magazine while you relax and enjoy the moment.

Through the built-in infra panels the Tylö infra cabin "Prime" provides soothing long-wave heat. The infrared heat gives a pleasant feeling of relaxation and wellbeing, this infrared heat is the same kind that the sun provides us with. The infrared heat itself is generated by the CarbonFlex™ heating panels and due to the huge surface area of these heating panels the heat is evenly distributed, providing a comfortable surface temperature to the bathers. The CarbonFlex™ heating panels contains well-proven techniques which provide both reliability and safety.

The infra cabins come in six different models suitable for 1 person up to 4 persons. Four of the models have a front entrance and two of the models have a corner entrance. The wall sections are fitted and secured using the snap-in closure, making the Tylö infra cabin "Prime" very easy to assemble.

Tylö infra cabin "Prime" is equipped with chromotherapy, easily controlled by the internal control panel. Choose the light colour most suitable to your mood, or choose rotating colours for added relaxation and serenity. Each sauna also includes integral mini- spotlights in the interior ceiling and on the exterior ceiling pelmet.

Features that make the difference.

- **CarbonFlex™ heating panels.** Heating panels with large surface area providing soft heat evenly distributed from all sides (no hot or cold spots). Infra panels in bench, wall- and floor sections.
- **Scandinavian design.** A clean Scandinavian design in combination with wall sections in Canadian hemlock. All infra cabins are finished in a white exterior paint.
- **Easy to assemble.** Fast assembly with no tools required. Wall panels mounted onto an easy-fit base and topped with easy-fit ceiling panel. To be safely plugged into most standard household electrical sockets.
- **Freedom of choice.** The Tylö infra cabin Prime comes in 6 different models, ideal for the smaller space as well as the more generous one. Models are available with both corner- and front entrance.
